# Facts about mammals

- All mammals are vertebrates (they have backbone or spinal column).
- All mammals are viviparous except monotremes (echidna and platypus).

Platypus

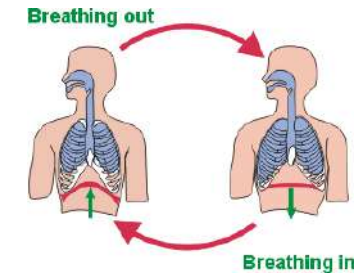

- Mammals can be carnivores, herbivores or omnivores.

# Facts about mammals

- Mammals drink their mother's milk

- Mammals breathe with their lungs, as humans do

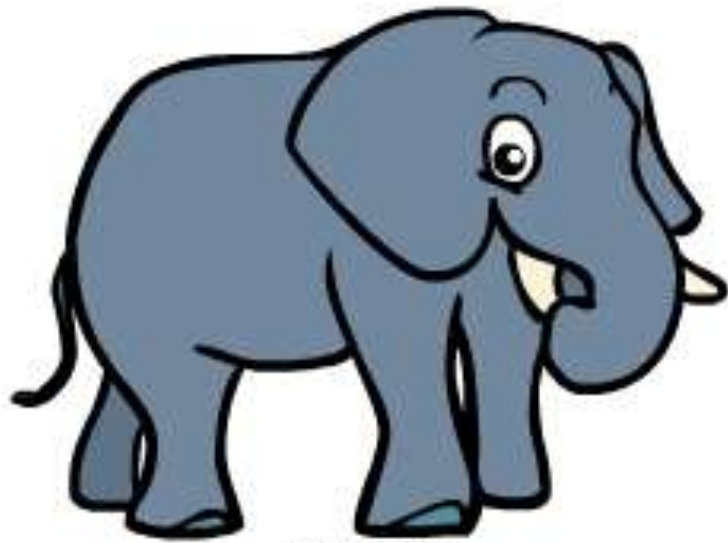

- Mammals have fur or hair

- Mammals have four legs in the most cases

- For example, dolphins have flippers instead of legs

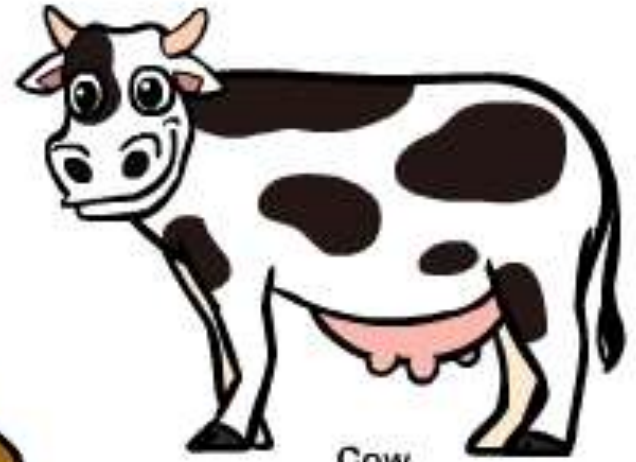

Elephant

Kangaroo

Cow

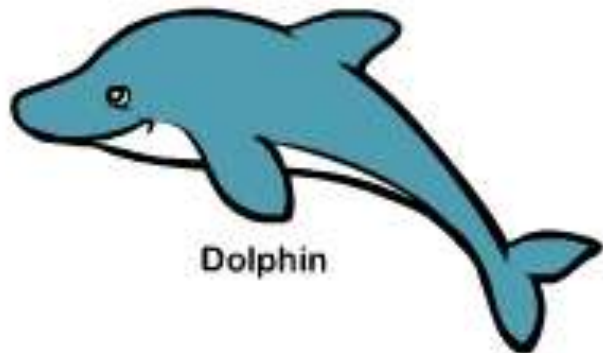

Bat

Rat

Mongoose

Dolphin

Rabbit

Springhare

Baboon

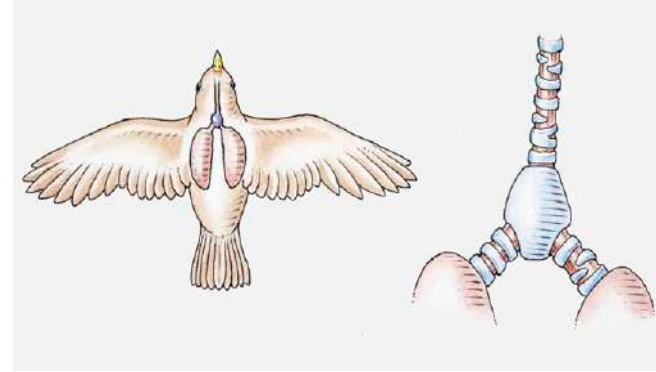

# Facts about birds

- Birds are oviparous. They incubate eggs.
- Birds can be carnivores, herbivores or omnivores.
- They don't drink milk as mammals do, so adults birds find food for their babies.

# Facts about birds

- Birds breathe with lungs.

- They have feathers and wings.
